1. The reply filed on 6/12/06 is not fully responsive to the prior Notification of Non-Compliant Appeal Brief, included the order from the BPAI. Since the above-mentioned reply appears to be *bona fide*, applicant is given **ONE (1) MONTH or THIRTY (30) DAYS** from the mailing date of this notice, whichever is longer, within which to supply the omission or correction in order to avoid abandonment. **EXTENSIONS OF THIS TIME PERIOD MAY BE GRANTED UNDER 37 CFR 1.136(a).**

The BPAI order states.

(v) Summary of claimed subject matter. A concise explanation of the subject matter defined in each of the independent claims involved in the appeal, which shall refer to the specification by page and line number, and to the drawing, if any, by reference characters. For each independent claim involved in the appeal and for each dependent claim argued separately under the provisions of paragraph (c)(1)(vii) of this section, every means plus function and step plus function as permitted by 35 U.S.C. 1 12, sixth paragraph, must be identified and the structure, material, or acts described in the specification as corresponding to each claimed function must be set forth with reference to the specification by page and line number, and to the drawing, if any, by reference characters.

Applicants claim 1 reads: A method of transmitting data comprising the steps of: channel coding an encoder packet to produce a channel coded encoder packet; and puncturing and/or repeating the channel coded encoder packet to produce a first encoder sub-packet having a first size based on a size of the encoder packet and a first data transmission rate at which the first

Art Unit: 2112

encoder sub-packet is to be transmitted, wherein the first data transmission rate is different from and based on a data rate for transmitting the first encoder sub-packet indicated in a first rate indication message from a receiver.

What the BPAI is requiring is for the limitations of the claimed subject matter be mapped to the specification and/or drawings. Thus for claim 1 above. A method of transmitting data *as illustrated, for example, in FIGS. 2 and 3.* comprising the steps of: channel coding an encoder packet to produce a channel coded encoder packet (show where this limitation is supported in the specification and/or drawings); and puncturing and/or repeating the channel coded encoder packet (show where this limitation is supported in the specification and/or drawings) to produce a first encoder sub-packet (where?) having a first size based on the size of the encoder packet (where?) etc.. This is to be done for each independent claims involved in the appeal and for each dependent claim argued separately. What applicants have provided is a concise explanation of the disclosed invention not of the claimed invention. Applicants have not mapped the claimed invention to the disclosed invention as required by the board.
